HERE'S THE PLAN

Three steps to real work, done.

1

Plug it in

It sits on your desk and stays on, day and night.

2

Connect your chat

Telegram, WhatsApp or Discord. Whatever you use.

3

Ask for real work

Research, build, automate. It gets it done.

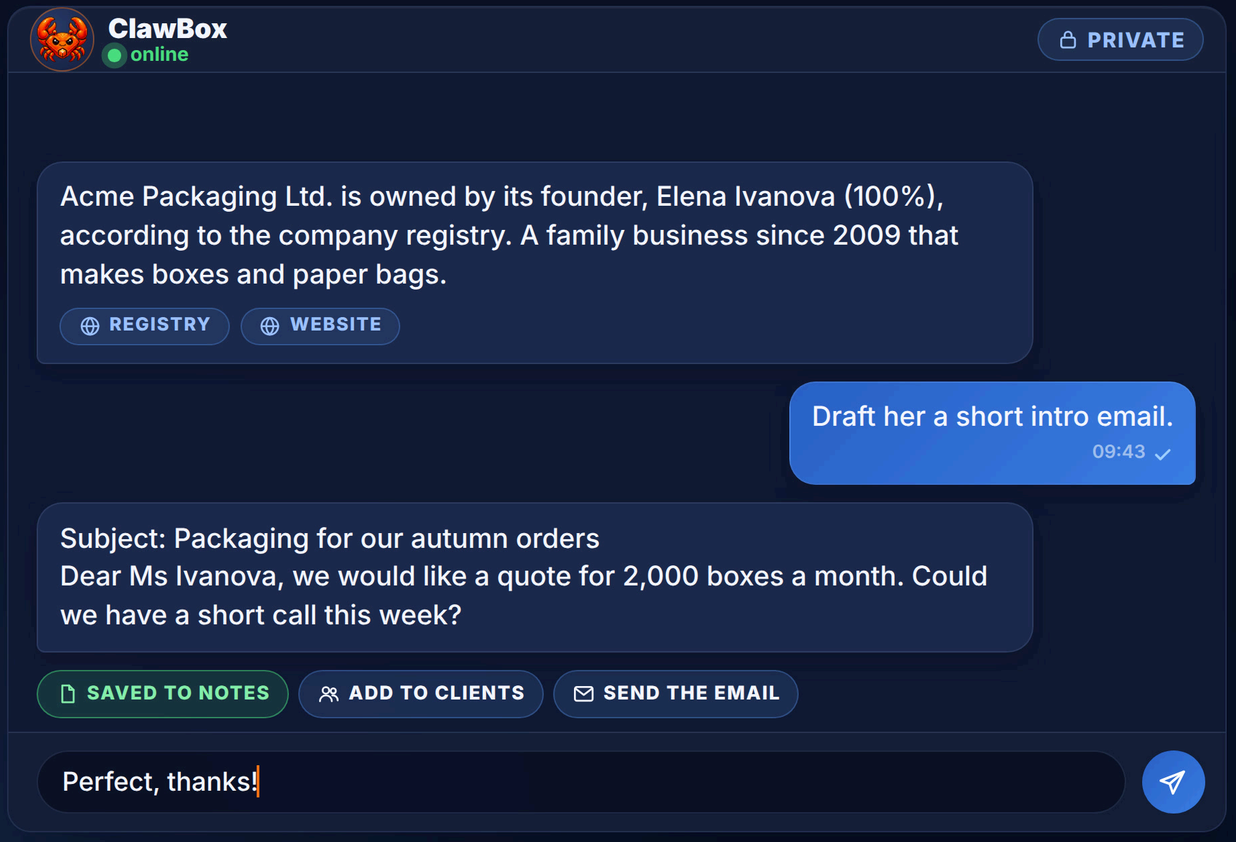

Here's what ClawBox can do for you →

YOUR ASSISTANT IN TELEGRAM

Ask once. Get answers with sources.

You type a question. ClawBox does the digging and drafts the next step.

WHAT CLAWBOX IS DOING — LIVE

- Understand the question
- Search the company registry
- Read the company website
- Cross-check and cite sources
- Draft the intro email

SOURCES — 2 FOUND

- **Company registry**
  registry.example · ownership
- **Company website**
  acme-packaging.example · products

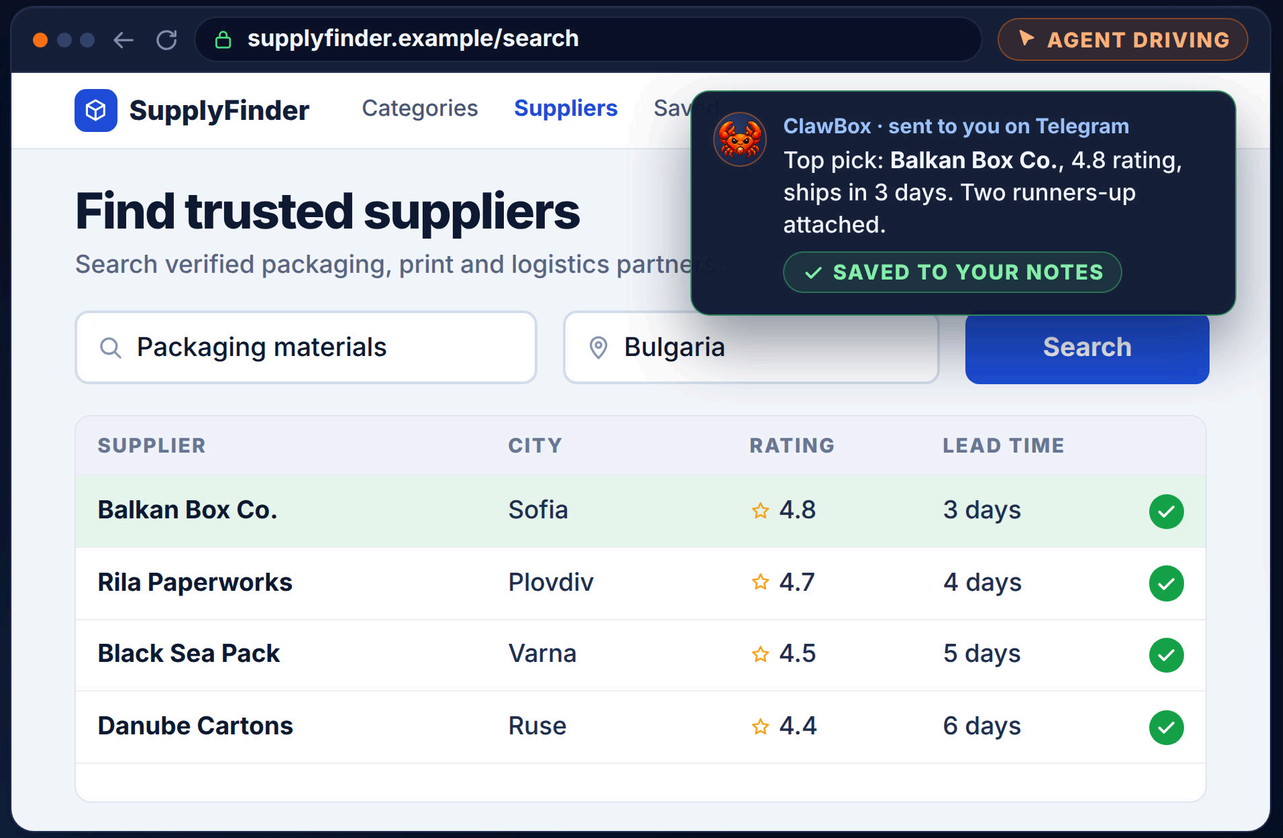

Answered with sources
2 sources · email draft ready

Illustrative demo · fictional company and person

BROWSER AUTOMATION

Give the clicking to your AI.

It opens sites, accepts the cookies, fills the forms and brings back what you asked for.

YOUR REQUEST — TELEGRAM

"Find packaging suppliers in Bulgaria and send me the best three."

AGENT STEPS — WORKING

- Open supplyfinder.example
- Accept the cookie banner
- Fill in the search form
- Run the search
- Extract 4 of 4 rows
- Report back to you

Shortlist delivered
3 suppliers, ranked and sourced

Illustrative demo · fictional website and suppliers

ClawBox

CODING AGENTS

Describe it. Agents build it.

They plan, write, test and ship, while you watch your app come to life.

Planner	Plan ready ✓
Builder	Code complete ✓
Tester	All green ✓

YOU **Build me an inventory dashboard with low-stock alerts.**

Shipped · live at inventory.local

PLAN

- ✓ Layout & navigation
- ✓ Stock table & data
- ✓ Low-stock alerts
- ✓ Tests & ship

FILES

```
inventory/
  package.json
  README.md
  src/                NEW
    App.jsx           NEW
    Dashboard.jsx     NEW
    StockChart.jsx    NEW
    alerts.js         NEW
  inventory.test.js   NEW
```

Dashboard.jsx

```jsx
export function Dashboard({ items }) {
  const low = items.filter(isLow);
  return (
    <Page title="Stockroom">
      <Stats items={items} low={low} />
      <StockChart items={items} />
      <AlertBadge count={low.length} />
    </Page>
  );
}
```

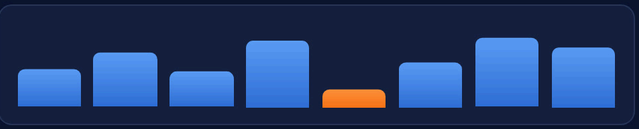

Terminal

```
✓ shows stock totals
✓ flags low stock
✓ filters by location
✓ renders the chart
✓ adds a new item
5 passed · 0 failed · ready to ship
› deployed · watching for changes
```

inventory.local · live preview · ✓ DEPLOYED

Stockroom Overview Items + Add item

Products +1 new	Low stock	Locations
249	3	2

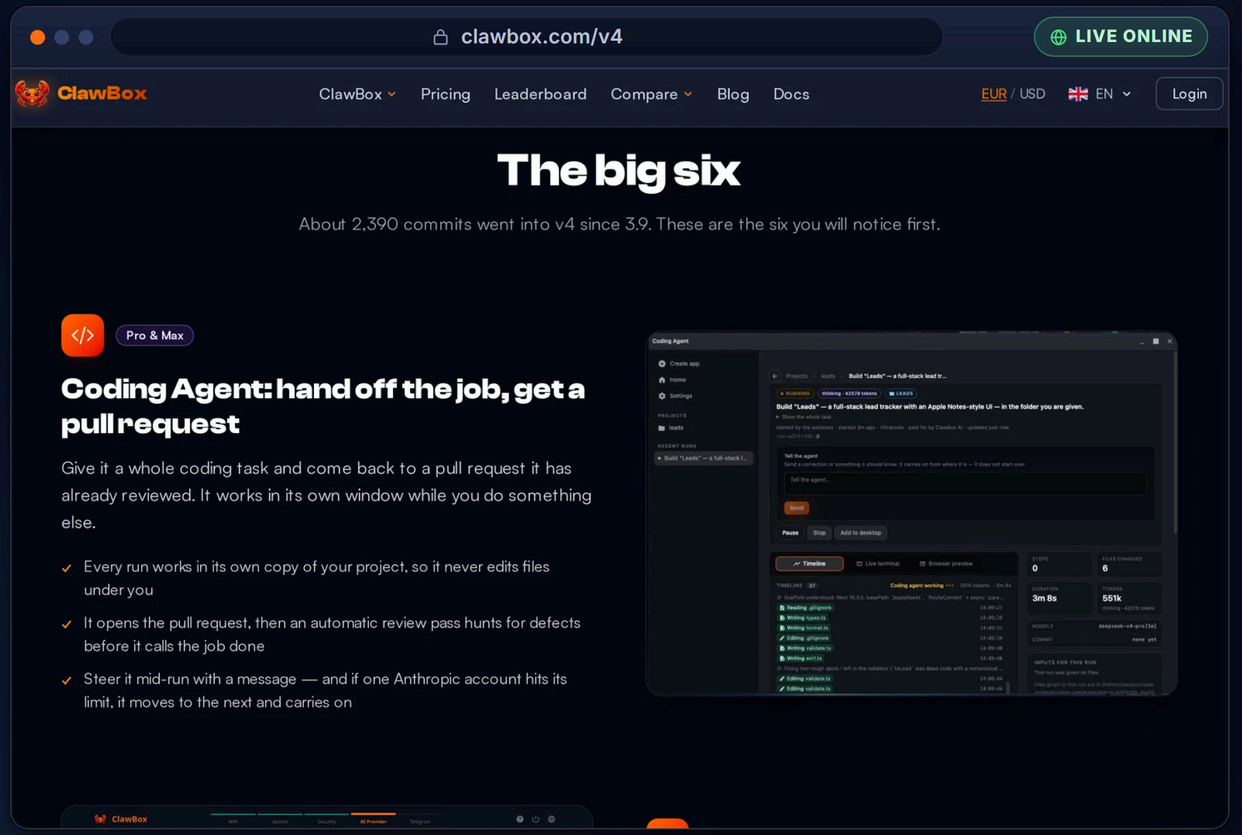

Inventory		3 items low on stock
Desk kit	42	In stock
Cable set	6	Low stock
Label rolls	18	In stock
Tape rolls	24	In stock

PROJECTS

Real projects. Real agents.

Our own ops dashboard, documents and marketing, built by ClawBox agents.

Ops dashboard	7 screens
Documents & marketing	3 projects

10 / 10 DOCUMENTS & MARKETING

Product launch page

Coding Agent

The “What’s new in ClawBox v4” page and the site-wide banner, shipped to our live website as a pull request.

LIVE WEBSITE PULL REQUEST

Real screenshots · the dashboard runs on demo data, no customer data

ALWAYS ON

Wake up to work already done.

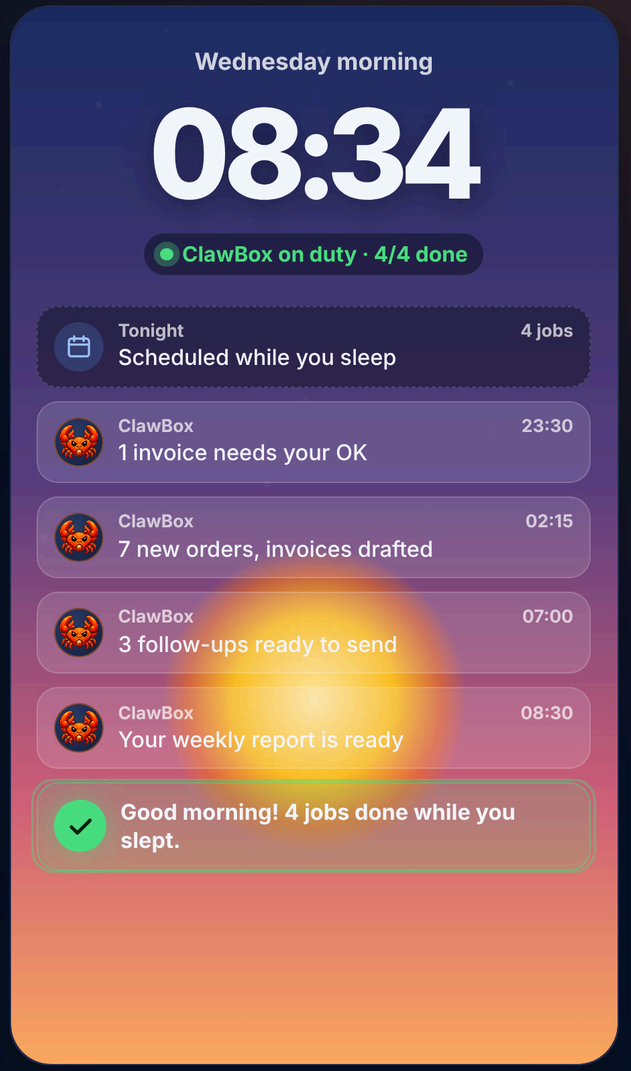

Scheduled jobs run through the night, so your morning starts ahead.

23:30 — INBOX WATCH
Supplier invoice, caught
It needs your OK by Friday.
✓ DONE

02:15 — NEW ORDERS
Orders sorted overnight
7 new web orders, invoices drafted.
✓ DONE

07:00 — CLIENT FOLLOW-UPS
Follow-ups written for you
3 clients have waited 5 days for a reply.
✓ DONE

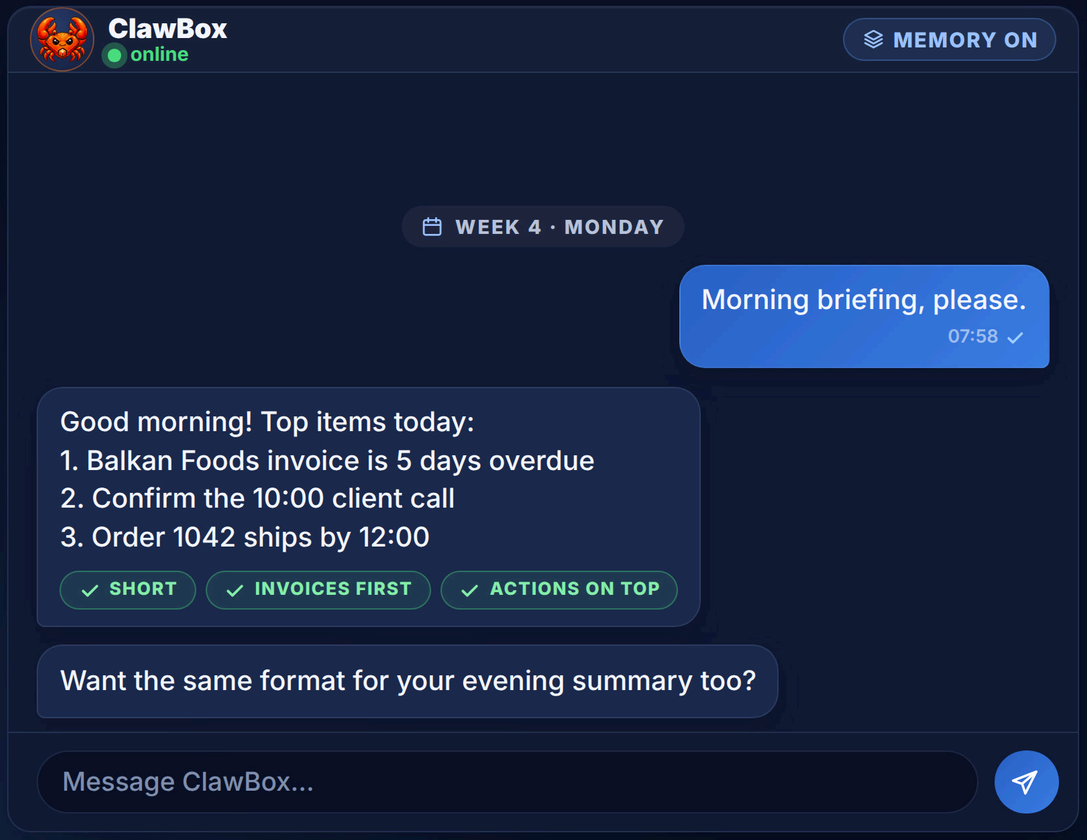

08:30 — WEEKLY REPORT
Sales report, ready to read
Revenue, top products, unpaid invoices.
✓ DONE

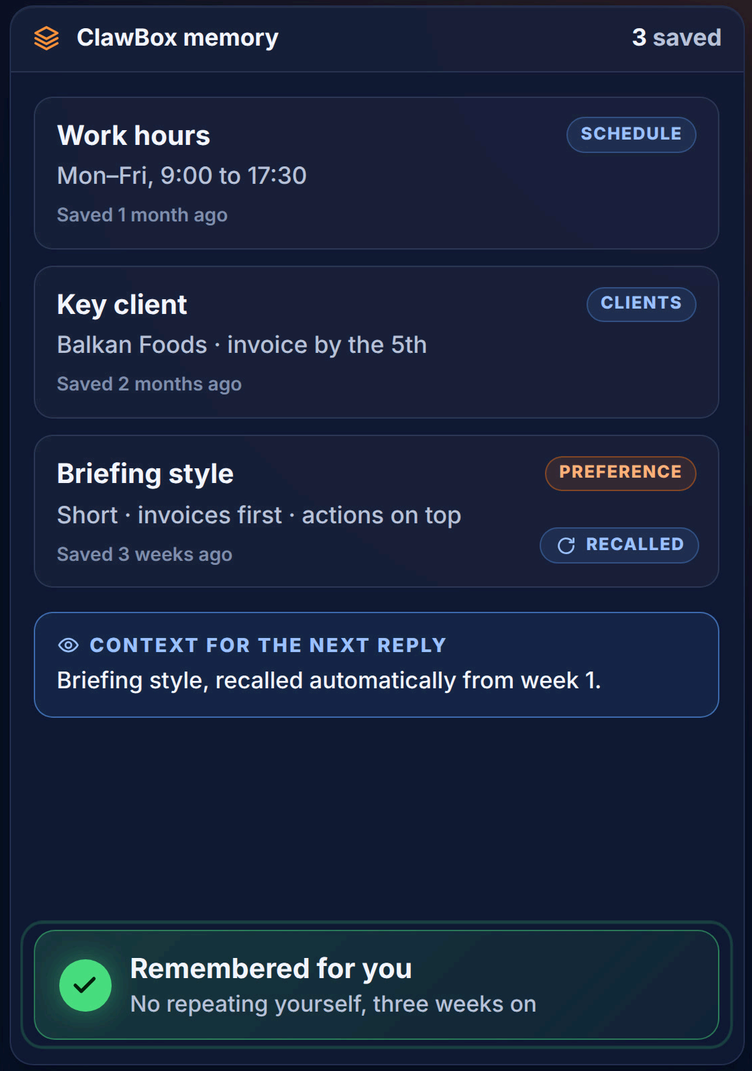

LONG-TERM MEMORY

Tell it once. It remembers.

Your preferences come back weeks later. No re-explaining.

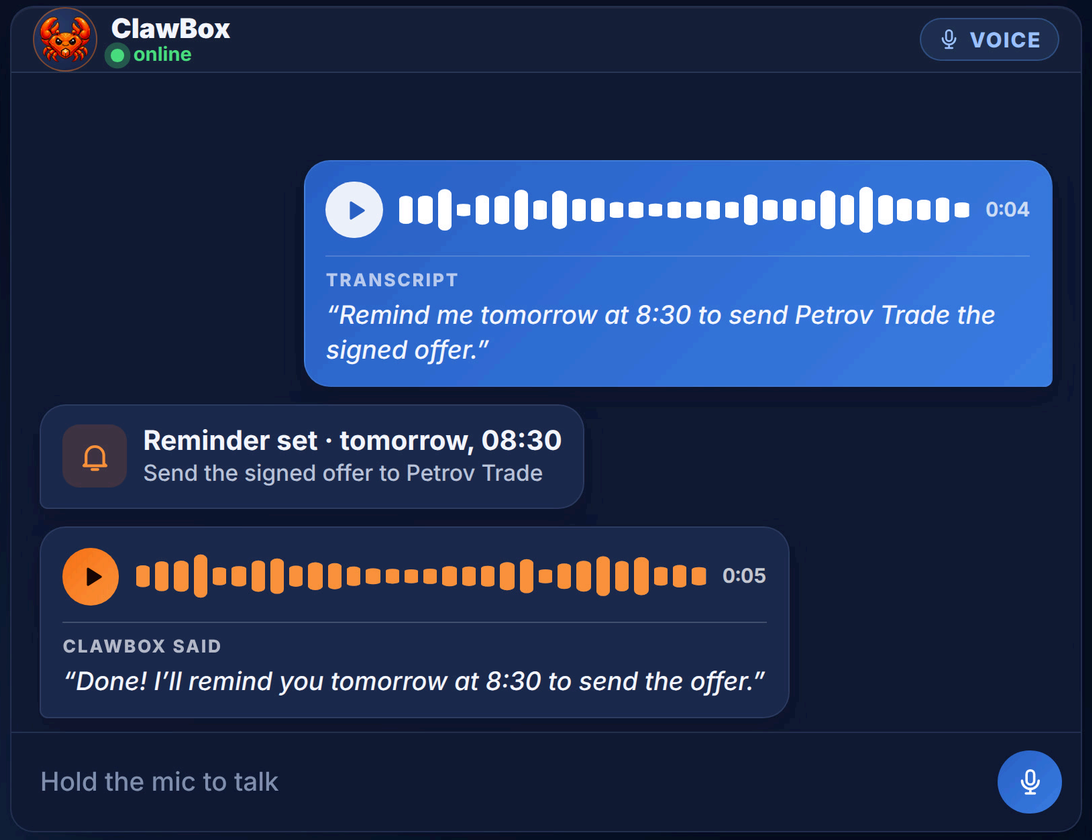

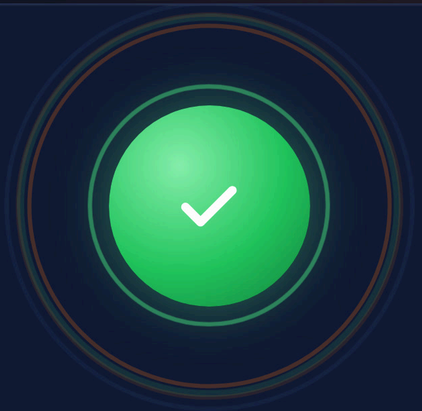

VOICE NOTES

Busy hands? Just say it.

Send a voice note. It understands, gets it done and talks back.

All set

Speech in, action taken, a natural voice back.

HANDS-FREE PIPELINE

- Turn speech into text
- Set the reminder
- Reply in a natural voice

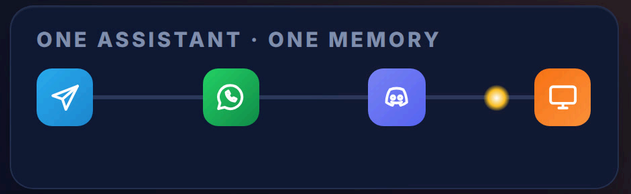

Sorted without typing
Understood, scheduled and confirmed

Silent demo · the voice is shown, not played

CONNECTED CHANNELS

Start anywhere. Finish anywhere.

Telegram, WhatsApp, Discord or the web desktop: same assistant, same task.

Telegram
On the train

New task

Start a quote for Balkan Foods.

Started: 20 units, setup and training.

WhatsApp
At lunch

Context from Telegram

Add a 2-year support plan.

Added. That's 4 items so far.

Discord
With the team

Context from WhatsApp

What's still missing?

Delivery date and payment terms. Added both.

Web desktop
At your desk

Context from Discord

Mark it all as checked.

All 6 checked. The quote is ready to send.

SHARED TASK · 014

Quote for Balkan Foods

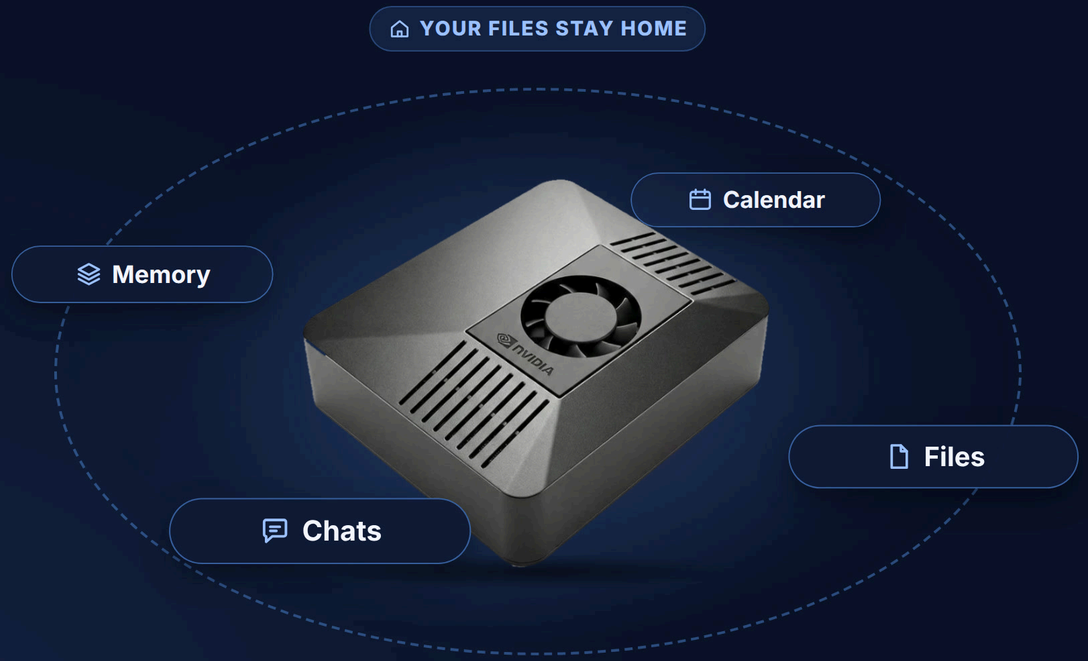

6 of 6 checked

- 20 × ClawBox
- Setup
- Team training
- Support plan
- Delivery date
- Payment terms

PRIVATE BY DESIGN

Your AI. Your desk. Your data.

It runs on hardware you own. Cloud models only when you choose.

NVIDIA Jetson Orin Nano · 8 GB · 67 TOPS

67 TOPS
AI performance

8 GB
Jetson Orin Nano

512 GB
NVMe SSD storage

24/7
Always on, on your desk

ON-DEVICE TASK — LOCAL MODEL

Summarise contract.pdf for me.

DONE HERE. NOTHING LEFT THE BOX.

CLOUD MODELS — OPTIONAL

Your call, per task
On: for this task only

Only what you send goes to the cloud provider you pick.

Private by default
Runs OpenClaw or Hermes Agent · always on

CLAWBOX FOR BUSINESS

Your time back starts here.

Pre-configured AI hardware. Made by IDRobots in Bulgaria.

MODEL 1

ClawBox

Personal AI hardware

ALWAYS ON · PRIVATE BY DEFAULT

€749 excl. VAT

MODEL 2

ClawBox Workstation

NVIDIA DGX Spark · 128GB

FULLY OFFLINE

€8,000 excl. VAT

1 Live demo
See it do real work.

2 Pilot
Try it in your business.
